<b>White Satin (190 gram) Standard 2-3" Core GRACoL FSC Certified</b>					
This instant dry, high resolution proofing paper uses a specially developed coating to minimize pigmented bronzing. The microporous coating provides an excellent surface to hold the darkest of black point while using up to 30% less ink over competitive medias. The ultra-low metamerism index and commercial shade make white satin 190 a great choice for commercial and publication proofing. Works with dye and pigmented ink sets.
